

# CRYOBIOLOGY AND CRYOTECHNOLOGY

Contents of Vol. 44 (No.1) , 1998

## Original paper

- 1 . Observation and Measurement of Frozen Biological Sample by 3-Dimensional Internal Structure Microscope  
Hideo YOKOTA, Ken-ichi KUDOH, Yasuyuki SAGARA and Gab-Soo DO ..... 1 ( 1 )

## Seminar “ Recent Developments in Cryobiology and Cryotechnology of Biological and Food Systems ”

May 31, 1997, Tokyo

- 1 . Things We Do Not Know about Cryopreservation of Biological Organs  
.....Ichiro TANASAWA .....10 (10)
- 2 . The Engineering Approach to the Cryopreservation of Living Tissue  
.....Kazuo TANISHITA and Masanobu UJIHIRA .....13 (13)
- 3 . Recent Advances in Drying Technologies for Biomaterials  
.....Arun S. Mujumdar .....19 (19)
- 4 . Diffusion of Moisture in Starch Foods during Cooking as Observed by NMR  
.....Hisahiko WATANABE and Mika FUKUOKA .....20 (20)
- 5 . Significance of Low Temperature Requirement on Dormancy Breaking for Tulip Bulbs as Estimated by <sup>1</sup>H-NMR  
.....Mari IWAYA-INOUE, Kei MOTOOKA and Goshi WATANABE .....21 (21)
- 6 . Biocontrol Technology of Fruits and Vegetables in Low Temperature Distribution Process  
.....Yoshikazu TANAKA .....29 (29)
- 7 . Preservation of Agricultural Products by the Use of Structured Water Formed by Dissolution of Xenon  
.....Sei-ichi OSHITA .....34 (34)
- 8 . Relationship between Liquid and Amorphous Solid Water: A View on Liquid Water  
.....Osamu MISHIMA .....37 (37)
- 9 . Control of Ice Crystal State in Frozen Foods and Its Application  
.....Osato MIYAWAKI .....43 (43)

## General Discussions
