4TH NY MASTERS COURSE IN ENDOCRINOLOGY AND ENDOCRINE SURGERY

December 7-9, 2017 | Icahn School of Medicine at Mount Sinai, New York, NY

COURSE DESCRIPTION

You are cordially invited to attend the 4th New York Masters Course in Endocrinology and Endocrine Surgery. New York City is the home of numerous world-class institutions with considerable expertise in endocrine surgery. Capitalizing on the close proximity of the immense New York endocrinology and endocrine surgery talent, the faculty will discuss current trends in endocrine surgery in a highly interactive setting.

The course will conduct an intensive review of key endocrinology and endocrine surgery topics over three days. In addition to basic and controversial topics in *thyroid*, *parathyroid*, *adrenal* and *pancreatic disorders*, the sessions will cover familial and neuroendocrine topics that are relevant to clinicians with an interest in endocrinology and endocrine surgery.

Current trends in endocrinology and techniques in minimally invasive surgery will be emphasized during the course and cadaver workshop. Part of the course will be combined with the American Multiple Endocrine Neoplasia Support (AMENS) Group Seminar for providers and patients in promoting patient-centered care and improved outcomes. At the end of each session we will conclude with a robust case presentation and panel discussion allowing for lively interactive dialogue between audience and faculty. Please join us in New York for this highly educational opportunity.

OBJECTIVES

Thyroid and Parathyroid Disorders

- Discuss current guidelines for treating thyroid cancer including an in-depth discussion of 2015 American Thyroid Association guidelines
- 2. Recognize trends in the diagnosis and management of hyperparathyroidism
- 3. Describe novel and minimally invasive approaches to the thyroid and parathyroid glands
- 4. Demonstrate techniques in minimally invasive surgery through live surgery and hands-on Cadaver Lab

Adrenal and Pancreas Disorders

- 1. Examine how to evaluate incidentally detected pathology
- 2. Describe the management of functioning tumors to improve the outcomes of surgery
- 3. Discuss pearls for improving outcome and minimizing surgical complications

Familial and Neuroendocrine Conditions

- Improve the understanding of the link between cervical and abdominal endocrine pathology in familial conditions
- Discuss and evaluate 2015 American Thyroid Association (ATA) guidelines for the management of medullary carcinoma

American Multiple Endocrine Neoplasia Support Group Seminar

- Improve the understanding of the multiple endocrine neoplasia diseases via lectures and patient interactions
- Discuss the role of patient-centered outcomes research to improve coordination between the primary care physicians and the specialized providers

TARGET AUDIENCE

General Surgeons, Endocrine Surgeons, Head and Neck Surgeons, Endocrinologists, Otolaryngologists, Primary Care Physicians, Residents, Fellows, allied health professionals, patients and family members interested in Multiple Endocrine Neoplasia Syndrome.
