

Dear Japan Hormone and Cancer Society

Please find below text to be put on the JHCS website as a notice to members regarding Endocrine-Related Cancer's latest impact factor:

Endocrine-Related Cancer has received a 2016 impact factor of 5.267, its highest since 2003. The journal remains in the top quartile of both its categories, ranking 21/138 in the endocrinology and metabolism category and 41/217 in the oncology category.

The Editorial Board's strict acceptance policy and impressive commissioning strategy continues to ensure that *Endocrine-Related Cancer* remains the leading journal linking oncology and endocrinology. We would like to thank all Editors, authors and reviewers for their continued efforts.
