

The 2nd International Symposium

Monday, Dec 17, 2018 9:00-17:45

FUKUTAKE Learning Theater, Hongo Campus, UTokyo

"Functional synaptic architecture of visual cortex"

David Fitzpatrick (MPI Florida)

"Early organization and development of the visual pathway"

Ghislaine Dehaene-Lambertz (CNRS)

"Chromatin-level regulation of neural stem/progenitor cell fate"

Yukiko Gotoh (UTokyo / IRCN)

"The Use of EEG and Evoked Potentials as Biomarkers in Neurodevelopmental Disorders"

Charles Nelson (Boston Children's Hospital)

"Aligning ears and mouths: the consequences of synchronizing heard and spoken language"

David Poeppel (MPI Frankfurt / NYU)

"Predictive Learning: A computational theory of social cognitive development"

Yukie Nagai (NICT)

"Molecular networks of cognition"

Genevieve Konopka (UT Southwestern)

"Understanding human singularity : narrowing down the search"

Stanislas Dehaene (NeuroSpin)
